Omar Rehan

Full-Stack Developer (MERN Stack)

Mobile: +20 127 661 2118 Email: omarrehan724@gmail.com Address: Cairo, Egypt
LinkedIn: linkedin.com/omar-rehan GitHub: github.com/omar-rehann Portfolio: omar-rehann.github.io

Summary

Full-Stack Developer specializing in the MERN Stack, passionate about building scalable SaaS applications and business-oriented web solutions that solve real-world problems. Experienced in frontend and backend development, RESTful API design, database integration, and authentication, with a strong focus on security, performance, and user experience. Also experienced in mentoring 100+ students in React.js and Next.js.

Skills

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js
- **UI & Styling:** Tailwind CSS, Bootstrap, React Bootstrap, Shadcn UI, Hyper UI, Responsive Design
- **State & Routing:** React Hooks, Redux Toolkit, React Router
- **Backend Development:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB, Mongoose, Database Design & Integration
- **Authentication & Security:** JWT, Clerk, Role-Based Authentication
- **File & Cloud Services:** Multer, ImageKit
- **Tools & Workflow:** Git, GitHub, Vercel, VS Code
- **Programming Concepts:** OOP, Data Structures & Algorithms, Problem Solving
- **Soft Skills:** Teaching & Mentoring, Communication, Teamwork & Collaboration

Professional Experience

Freelance Full-Stack Developer *Zero Tech* *2026 – Present*

- Developed a responsive e-commerce platform for security systems using Next.js and React, including advanced product filtering, shopping cart, and secure authentication with Clerk.
- Fully managed the project from requirements gathering to delivering Phase 1 on schedule.

Freelance Front-End Developer *Beti* *2025*

- Fixed 15+ critical post-launch bugs on a React.js real estate platform.
- Restored missing data and broken links, significantly improving platform stability and user trust.

Front-End Instructor *Techno Square* *2025*

- Taught React.js and Next.js to 100+ students through hands-on projects and weekly code reviews.
- Improved students' code quality by enforcing best practices and clean architecture principles.

Projects

POS System (Multi-Vendor Retail Platform) Live Demo | GitHub

- Developed a full-stack POS platform for a multi-shop mall with Admin, Manager, and User roles, allowing customers to browse, place orders, and track purchases with simulated payments (Visa, InstaPay).
- Built an admin dashboard (stores, services, managers, users, invoices, live analytics charts) and a manager interface for products and revenue tracking, secured with role-based authorization.
- **Tech Stack:** MongoDB, Express.js, Next.js, Node.js, JWT, bcrypt, Tailwind CSS, Recharts.

Doctor Appointment Management System Live Demo | GitHub

- Developed a full-stack appointment platform with Admin, Doctor, and User interfaces, allowing users to browse doctors and specialties, book appointments, and manage bookings.
- Built an admin dashboard for managing doctors, services, users, and appointments, and a doctor interface for daily bookings, secured with JWT and bcrypt role-based authorization.

- **Tech Stack:** MongoDB, Express.js, Next.js, Node.js, JWT, bcrypt, Tailwind CSS, ImageKit, Vercel.

One Stop EShop (E-Commerce Platform) Live Demo | GitHub

- Developed a full-stack e-commerce platform with product search and filtering by category, price, and rating, product reviews, cart management, and PayPal checkout.
- Built an admin dashboard for managing products, orders, and users, with a responsive Dark/Light mode interface.
- **Tech Stack:** React 19, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, PayPal API, Vercel.

Food Restaurant Management & Ordering Platform Live Demo | GitHub

- Developed a full-stack restaurant platform where customers browse food categories, manage their cart, and place orders through a responsive interface.
- Built an admin dashboard for managing the menu, categories, and food items, with JWT authentication and role-based access.
- **Tech Stack:** MongoDB, Express.js, Next.js, Node.js, JWT, Tailwind CSS, shadcn/ui, Supabase Storage, Vercel.

Car Marketplace Live Demo | GitHub

- Built a car marketplace with search, filtering, and browsing, plus full admin CRUD operations, using a responsive UI with reusable components.
- Integrated Clerk authentication, Cloudinary media processing, and Drizzle ORM queries for fast page loads and reliable data.
- **Tech Stack:** React.js, Tailwind CSS, shadcn/ui, PostgreSQL, Drizzle ORM, Clerk, Cloudinary, Vercel.

Certifications

- **JavaScript Algorithms and Data Structures** — freeCodeCamp 2025
- **Responsive Web Design** — freeCodeCamp 2025
- **Front-End Development** — Mahara Tech 2025
- **Introduction to Front-End Development** — Coursera 2024

Education & Training

B.Sc. in Computer Science **Port Said, Egypt** *2021 – 2025*
and Information Technology *Faculty of Science, Port Said University*

- Grade: Very Good (B+)
- Graduation Project: Online Examination System using front-end technologies

Build Your Startup Training *Creativa* *2026*

- Completed startup training focused on business idea validation, market research, and collaborating with a team to develop and evaluate a startup concept.

LinkedIn & Job Ready Training *ITIDA* *2025*

- Completed training in CV writing, ATS optimization, LinkedIn profile development, and job application skills, achieving a CV evaluation score of 8/10.

Freelancing Training *ITIDA* *2025*

- Completed a two-week training focused on freelancing fundamentals, building a professional profile, finding clients, and creating effective proposals.

Front-End Development Trainee *ITI* *2024*

- Completed a two-month, 120-hour hybrid Front-End Development training program covering HTML5, CSS3, JavaScript, Bootstrap, and SASS, with hands-on development of responsive web applications.
