LinkedIn: [linkedin.com/in/omar-rehan](https://www.linkedin.com/in/omar-rehan) GitHub: github.com/omar-rehann Portfolio: omar-rehann.github.io

Summary

Junior MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Experienced in developing RESTful APIs, authentication and authorization, admin dashboards, CRUD operations, database integration, supabase image storage, and deploying applications to production. Strong foundation in responsive frontend development with React.js and Next.js.

Professional Experience

Freelance Front-End Developer *Beti*

January 2026 – Present

- Collaborated with the project owner to identify and fix post-launch issues on a React.js-based Saudi real estate platform for agents, buyers, and tenants.
- Resolved image loading failures, missing developer data, and broken footer social links, improving overall site reliability.

Freelance Front-End Developer *Zero Tech*

August 2025 – Present

- Architected a responsive security systems e-commerce site with Next.js/React.js, including product filtering, cart, Clerk auth, and RTL support.
- Gathered client requirements independently and delivered Phase 1 on schedule; planned multi-language and Dark/Light Mode support.

Front-End Instructor *Techno Square*

April 2025 – July 2025

- Taught React.js and Next.js to 100+ students through hands-on projects and code reviews, improving overall code quality and best practices.

Front-End Development Training Program *(ITI)*

Jul 2024 – Aug 2024

- Completed 120-hour training covering HTML5, CSS3, JavaScript, Bootstrap, and SASS.
- Built responsive web applications using modern front-end practices.

Skills

- **Frontend Development:** HTML5, CSS3, Responsive Design, JavaScript (ES6+), TypeScript, React.js (React Hooks, Redux Toolkit, React Router), Next.js, Bootstrap, Tailwind CSS, Shadcn UI, Component-Based Architecture, UI/UX Fundamentals
- **Backend Development:** Node.js, Express.js, RESTful APIs, Authentication & Authorization (JWT, Clerk), CRUD Operations, Middleware, Strapi CMS
- **Database & Storage:** MongoDB, Mongoose, Supabase Storage, Database Design & Integration
- **Tools & Deployment:** Git, GitHub, Vercel
- **Programming Fundamentals:** OOP, Data Structures & Algorithms, C++
- **Soft Skills:** Problem Solving, Teamwork, Communication, Self-Learning

Projects

Food Restaurant Management Ordering Platform

- Developed a full-stack restaurant platform designed to support online food ordering and restaurant management through dedicated customer and admin interfaces.
- Built a customer-facing platform that allows users to browse food categories, explore menu items, manage their cart, and place food orders through a responsive interface.
- Developed an admin dashboard for managing the restaurant's menu, categories, food items, and operational data through a centralized management system.
- Implemented secure user authentication and role-based authorization to separate customer and administrative access.
- **Tech Stack:** MongoDB, Express.js, React.js, Next.js, Node.js, Mongoose, JWT, Tailwind CSS, Shadcn UI, React Bootstrap, Supabase Storage, Git, GitHub, Vercel
- **Demo:** [Live Demo](#) **GitHub:** [Repository](#)

Car Marketplace

- Built a high-performance e-commerce marketplace designed to streamline vehicle search and comparison, enabling users to filter and browse cars effortlessly through an intuitive UI.
- Integrated secure Clerk authentication, instant Cloudinary media processing, and dynamic database queries via Drizzle ORM to ensure fast page load speeds and data reliability.
- Engineered a responsive UI with reusable components using React.js, Tailwind CSS, and shadcn/ui, including full admin CRUD operations.
- **Tech Stack:** React.js, Tailwind CSS, shadcn/ui, PostgreSQL, Drizzle ORM, Clerk, Cloudinary.
- **Demo:** [Live Demo](#) **GitHub:** [Repository](#)

Home Services Platform

- Designed a seamless service marketplace connecting customers with local service providers through structured categories and a transparent online booking workflow.
- Optimized UI responsiveness and page routing using **Next.js** and **shadcn/ui**, driving higher user retention and booking completion rates.
- Integrated **Strapi CMS** via REST APIs for real-time category management and service content deployment with Clerk authentication.
- **Tech Stack:** Next.js, React.js, Strapi CMS, Tailwind CSS, shadcn/ui, Clerk.
- **Demo:** [Live Demo](#) **GitHub:** [Repository](#)

Online Courses & Certifications

• Introduction to Front-End Development <i>Coursera (2024)</i>	• JavaScript Algorithms and Data Structures <i>freeCodeCamp (2024)</i>
--	--

Education

B.Sc. in Computer Science <i>Faculty of Science, Port Said University</i>	Port Said, Egypt <i>2022 – 2025</i>
Grade: Very Good (B+)	
Graduation Project: Online Examination System using front-end technologies	

Languages

- **Arabic** [Native]
- **English** [B1]
